

LDSC HEALTH AND SAFETY POLICY

HEALTH AND SAFETY POLICY

The executive of the Lac Deschênes Sailing Club is vitally interested in the safety of all employees, members and visitors. It recognizes that activities of boating have inherent risks and it shall strive to minimize these for those who engage in the sport and provide for its activities. Protection of these persons from injury or "occupational diseases" is a major continuing objective. Every effort will be made to provide a safe and healthy work environment for workers. Both workers and those responsible for supervision or exercising control over them must be dedicated to the continued objective of reducing risk or injury.

Every worker must protect his or her own health and safety by working in compliance with the law and with safe working practices and procedures established by the executive.

Members of the Lac Deschênes Sailing Club shall strive to ensure that any activity they are engaged in shall be carried out in a manner which will not affect their own or other persons health and safety. It is in the best interest of all parties to consider safety in every activity and these must form an integral part of this organization.
